Other activities:

- production and processing of fuels and lubricants
- brokering services
- purchase of goods for resale and sale
- repair services for the operation of motorized road transport and consultancy in the field of road transport
- road passenger transport
- leasing and renting of movables

#### Ownership structure

The majority shareholder of the Company is UNIPETROL RPA, s.r.o with share of 99.4%.

The merger by amalgamation of UNIPETROL RPA, s.r.o. and BENZINA, s.r.o. was approved by the companies' General Meetings with legal succession of UNIPETROL RPA, s.r.o. on 21 December 2015. The legal effects of the merger came into force as at 1 January 2016.

Statutory representatives of the company

Statutory representatives of the Company as at 31 December 2016 were as follows:

Statutory representative	Radek Nechleba
Statutory representative	Emanuel Jakisch
Statutory representative	Tomáš Sedlák

Changes in the statutories till 31 December 2016 were as follows:

Position	Name		
Statutory representative	Mirosław Zubek	Resignated	5 April 2016
Statutory representative	Emanuel Jakisch	Elected to the office	4 May 2016
Statutory representative	Leszek Szelerski	Resignated	31 July 2016
Statutory representative	Tomáš Sedlák	Elected to the office	30 September 2016

Each statutory representative acts independently on behalf of the Company.

Group identification and consolidation

The Company is part of the consolidation group of UNIPETROL, a.s. ("the Group"). Pursuant to section 62(2) of Decree No. 500/2002 Coll., the financial statements of the Company and of all entities consolidated by UNIPETROL, a.s. have been included in the consolidated financial statements of UNIPETROL, a.s. with its registered office at Prague 4, Na Pankráci 127, 140 00, ID No. 616 72 190.

#### 2. PRINCIPLES OF PREPARATION OF FINANCIAL STATEMENTS

The separate financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) and their interpretations approved by the International Accounting Standards Board (IASB) which were adopted by the European Union (EU) and were in force as at 31 December 2016. Financial statements have been prepared based on historical cost, except for: derivatives, financial instruments at fair value through profit and loss, financial assets available for sale, and investment properties stated at fair value.

The separate financial statements are compliant with all requirements of IFRSs adopted by the EU and present a true and fair view of the Company's financial position as at 31 December 2016, results of its operations and cash flows for the year ended 31 December 2016.

These separate financial statements have been prepared on a going concern basis. As at the date of approval of the statements there is no uncertainty that the Company will not be able to continue as a going concern in the foreseeable future.

The separate financial statements, except for the statement of cash flows, are prepared on the accrual basis of accounting. Applied accounting policies are listed in note 21.3.

Penalties and compensations earned	533	1 630
VAT refunds	349	337
Other	559	921
	1 479	4 169

In 2016 in the line "Other" dissolution of accruals in amount of CZK 320 thousand (2015: CZK 612 thousand). Sale of materials in amount of CZK 241 thousand in 2015.

#### 5.2 Other operating expenses

	2016	
Recognition of receivables impairment allowances	(2)	(45)
Penalties and compensations	(504)	(152)
Other	(118)	(1 012)
	(624)	(1 209)

#### 6. FINANCE COSTS

	2018	
Foreign exchange loss surplus	(84)	(206)
Other	(117)	(148)
1	(201)	(354)

#### 7. TAX EXPENSE

	2016	
Income tax expense in the statement of profit or loss	SECREMENTAL SIZE	710
Current income tax	(4 077)	(3 748)
Deferred income tax	1 220	1 847
	(2 857)	(1 900)
Income tax expense in other comprehensive Income		
Other	(6)	(5)
	(6)	(5)
	(2 863)	(1 905)

Domestic income tax is calculated in accordance with Czech tax regulations at the rate of 19 % in 2016 (2015: 19 %) of the estimated taxable income for the year. The deferred tax has been calculated using tax rate approved for the year 2016 and forward i.e. 19 %.

# 7.1 The differences between tax expense recognized in profit or loss and the amount calculated base on the rate from profit before tax

	2016	2015
Profit for the year	12 408	8 003
Total income tax expense	(2 857)	(1 900)
Profit excluding income tax	15 265	9 903
Income tax using domestic income tax rate	(2 900)	(1 881)
Non-deductible expenses	(42)	(128)
Tax relief	81	86
Under (over) provided in prior periods	(26)	(56)
Other differences	30	79
Total income tax expense	(2 857)	(1 900)
Effective tax rate	(18.72%)	(19.18%)

#### 7.2 Deferred tax

Deferred income tax result from future tax benefits and costs related to the differences between the tax basis of assets and liabilities and the amounts reported in the financial statements. The deferred income taxes have been calculated using the tax rate expected to apply to periods when the respective asset is realized or liability is settled (i.e. 19 % in 2016 and onward).

The movements in deferred tax liabilities were as follows:

		Deferred tax recognized in statement of profit or loss	Deferred tax recognized in other comprehensive income.	
Deferred tax ilabilities				
Property, plant and equipment	2 005	(830)	-	1 175
Provisions	(857)	11	6	(840)
Finance lease	541	(401)		140
	1 689	(1 220)	6	475
	1 689	(1 220)	6	475

Deferred tax assets and liabilities are offset when there is legally enforceable right to set off current tax assets against current tax liabilities and when the deferred taxes relate to the same tax authority.

#### 8. PROPERTY, PLANT AND EQUIPMENT

#### 8.1 Changes in property, plant and equipment

	Machinery and equipment	Vehicles and other	
01/01/2016

31/12/2015	AV s.r.o.		(100)
Net book value	136	100	236

#### 9.2 Other information

	2015	2615
The gross book value of all fully amortizated intangible assets still in use	280	280

The Company reviews economic useful lives of intangible assets and introduces adjustments to amortization charge prospectively according to its accounting policy. Should the amortization rates from the previous year be applied, the amortization expense for 2016 would be higher by CZK 45 thousand.

#### 10. TRADE AND OTHER RECEIVABLES

	3;/12/2016	
Trade receivables	36 607	27 174
Other	604	356
Financial assets	37 211	27 530
Other taxation, duty, social security receivables	190	192
Prepayments and deffered costs	1 148	722
Non-financial assets	1 338	914
Receivables, net	38 549	28 444
Receivables impairment allowance	3 195	3 195
Receivables, gross	41 744	31 639

Trade receivables result primarily from sales of services. The management considers that the carrying amount of trade receivables approximates their fair value. The average credit period on sales of services is 30 days.

The Company exposure to credit and currency risk related to trade and other receivables is disclosed in note 16 and detailed information about receivables from related parties is presented in note 19.

#### 11. OTHER FINANCIAL ASSETS

	31/12/2016	
Cash pool	31 876	28 871
	31 876	28 871

The Company is part of the Group's cash pool system, closing balances are shown in the table.

#### 12. CASH AND CASH EQUIVALENTS

	31/12/2016	31/12/2015
Cash on hand and in bank	1 959	2 383
	1 959	2 383

#### 13. EQUITY

#### 13.1 Share capital

The share capital of the Company as at 31 December 2016 amounted to CZK 16 000 thousand (as at 31 December 2015: CZK 16 000 thousand). Share of UNIPETROL RPA, s.r.o. is 99.4%, remaining part is share of UNIPETROL, a.s.

#### 13.2 Retained earnings

On the basis of shareholder's decision from 1 March 2016 was the profit amounted CZK 8 003 thousand settled as following: to UNIPETROL RPA, s.r.o. amount CZK 7 953 thousand and to UNIPETROL, a.s. CZK 50 thousand.

#### 14. PROVISIONS

Utilization of provision	(75)	-	(75)
Release of provision	(109)	(104)	(213)
	270	112	382

#### 14.1 Provisions for jubilee bonuses and retirement benefits

The Company realizes the program of paying out retirement benefits in line with remuneration policies in force. The retirement benefits are paid as one-time payments at retirement. The jubilee bonuses are paid to employees after a specified number of years at a significant anniversary. The base for the calculation of provision for an employee is expected benefit which the Company is obliged to pay in accordance with internal regulation.

The present value of these obligations is estimated at the end of each reporting year and adjusted if there are any material indications impacting the value of the obligations. The accrued liabilities equal discounted future payments, considering employee rotation.

Employment benefit provisions were created using discount rate 0.56% p.a. in 2016 (2015: 0.54%). Should the prior year's assumptions be used, the provision for the jubilee bonuses and retirement benefits would be higher by CZK 12 thousand.

#### 14.1.1 Change in employee benefits obligations

				t benefits	Total	
	31/12/2016	31/12/2016		31/12/2015	31/12/2016	31/12/2015

	CAV S.I.		25 484	25 484		25 484

#### 16.3.1 Methods applied in determining fair values of financial instruments (fair value hierarchy)

Fair value of shares quoted on active markets is determined based on market quotations (so called Level 1). In other cases, fair value is determined based on other input data, apart from market quotations, which are directly or indirectly possible to observe (so called Level 2) and data to valuation, which aren't based on observable market data (Level 3). Financial assets and liabilities carried at fair value by the Company belong to Level 2 as defined by IFRS.

In the year ended 31 December 2016 and the comparative period in the Company were no transfers between Levels 1, 2 and 3.

#### 16.4 Risk identification

The Company's activities are exposed to the risks of changes in foreign currency exchange rates, commodity prices and interest rates.

The UNIPETROL group's Corporate Treasury function provides services to PETROTRANS, s.r.o., coordinates access to domestic and international financial markets, monitors and manages the risks outlined below relating to the operations of the Company through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other market risks), credit risk and liquidity risk.

The Company seeks to minimize the effects of these risks by using natural hedging. The Company does not use derivative financial instruments to hedge these risk exposures. The potential use of financial derivatives is governed by the UNIPETROL group's policies, which provide written principles on currency risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess funds. Compliance with policies and exposure limits is reviewed by the UNIPETROL group's internal auditors on regular basis. The Company does not enter into or trade financial instruments, including derivative financial intruments, for speculative purposes.

	Finan		
Type of risk	Exposure	Measurement of exposure	Management/Hedging

Currency	currency exposure resulting from investment or probable liabilities and receivables in foreign currencies;		Market risk management policy and hedging strategies, which define principles of measurement of individual explosure.
	balance sheet exposure resulting from assets and liabilities denominated in foreign currency	analysis of balance sheet positions	parameters and the time horizon of risk hedging and hedging instruments.
Interest rate	Exposure resulting from owned assets and liabilities for which interest gains or losses are dependent on floating interest rates.	ratio:total net debt to positions for which interest costs are dependent on floating interest rate	
Liquidity	Risk of unforeseen shortage of cash or lack of access to financing sources, both in the horizon of short and non-current borrowing, leading to temporary or permanent loss of ability to pay financial liabilities or imposing the need to obtain funds on unfavourable terms.	cash flows planning in short and long-term horizon	Short-term liquidity risk management policy, which defines rules of reporting and consolidation of liquidity of Unipetrol and Unipetrol Group entities. Group carries out a polidy of its financing sources diversification and uses range of tools for effective liquidity management.
Losing cash and deposits	Risk of bankruptcy of domestic or foreign banks, in which accounts are kept or in which cash is invested for a short time.	short-term credit rating of bank	Management based on principles of surplus cash management, which determine possibility of granting quotas for individual banks made on the basis of, among others, ratings of investment and reporting data.
Credit	Risk of unsettled receivables for delivered products and services by customers. Credit risk is also related to the creditability of customers with whom sales transactions are concluded.	analysis of crediability and solvency of customers	Management based on procedures and policies adopted for management of trade credit and debt recovery.

#### 16.4.1 Currency risk

The currency risk arises most significantly from the exposure of trade liabilities and receivables denominated in foreign currencies. Foreign exchange risk regarding trade liabilities and receivables is mostly covered by natural hedging of trade liabilities and receivables denominated in the same currencies.

Currency structure of financial instruments denominated in main foreign currencies as at 31 December 2016

	31 876	28 871	31 876	28 871	

#### Sensitivity analysis for interest rate risk

The influence of financial instruments on profit before tax due to changes in significant interest rates:

	31/12/2016			
PRIBOR	+0.5 pp	+0.5 pp	159	144
			159	144

The above interest rates variations were calculated based on observations of interest rates fluctuations in the current and prior year as well as on the basis of available forecasts.

The sensitivity analysis was performed on the basis of instruments held as at 31 December 2016 and 31 December 2015. The influence of interest rates changes was presented on annual basis.

#### 16.4.3 Liquidity and credit risk

#### Liquidity risk

The following tables detail the Company's remaining contractual maturity for its financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities using the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

#### Maturity analysis of financial liabilities

		23 670			23 670	23 670

		Up to 1 year	From 1 to 3 years	From 3 to 5 years		

		25 606	3.00		(m)	25 606	25 606
Trade and other liabilities	15	25 606				25 606	25 606
		Up to 1 year	From 1 to 3 years	From 3 to 5 years			
				31/12/2015			

#### Credit risk

The Company's credit risk is primarily attributable to its trade receivables. The amounts presented in the statement of financial position are net of impairment losses, estimated by the Company's management based on prior experience and their assessment of the credit status of its customers.

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company. The Company has adopted a policy of dealing only with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. This information is supplied by independent rating agencies where available and, if not available, the Company uses other publicly available financial information and its own trading records to rate its major customers.

The Company's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the management. Before accepting any new customer, the Company uses own or external credit scoring system to assess the potencial customer's credit quality and defines credit limits by customer. Trade receivables of the customers outside the Group did not exceed 5 % of the total trade receivables (except for one creditworthy customer) as at 31 December 2016.

The Company does not have any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. The Company defines counterparties as having similar characteristics if they are related entities. The credit risk on liquid funds is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

Based on the analysis receivables, the counterparties were divided into two groups:

- Group I counterparty with good or very good history of cooperation in the current year,
- Group II other counterparties.

The division of not past due receivables

		31/12/2016	
Group I	10	37 211	27 530
~~~~		37 211	27 530

Change in impairment allowances of trade and other receivables

	31/12/2016	
At the beginning of the period	3 195	3 195
Recognition	2	45
Usage	(2)	(45)
	3 195	3 195

The Company sets impairment allowances based on analysis of customers' creditworthiness and ageing of receivables. In determing the recoverability of a trade receivable, the Company considers any change in the credit quality of the debtor from the date credit was initially granted up to the reporting date. The management considers that there is no further credit risk allowance required in excess of the allowance for impairment charges.

Increases and reversals of impairment allowances in respect of the principal amount of trade and other receivables are included in other operating expense or income, and default interest is included in financial expense or income.

#### 17. LEASE

#### 17.1 The Company as a lessee

#### Operating lease

#### Operating lease arrangements

The Company leases vehicles (trucks) under operating leases. Leasing vehicles typically run for three or four years. Lease payments are fixed at CZK, with contractually expected traveled kilometers. Part of the lease agreements have fixed lease payments specified in EUR, with a contract expected traveled kilometers.

Payments recognized as an expense were as follows:

	(8th _ E)	2016	2015
Cancellable operating lease	/0	13 234	15 090
		13 234	15 090
	THE REAL PROPERTY.		

#### Finance lease

As at 31 December 2016 and as at 31 December 2015 the Company did not possess any active finance lease agreements as a lessee.

#### 17.2 The Company as a lessor

As at 31 December 2016 and as at 31 December 2015 the Company did not possess any finance or operating lease agreements as a lessor.

# 18. INVESTMENT EXPENDITURES INCURRED AND FUTURE COMMITMENTS RESULTING FROM SIGNED INVESTMENT CONTRACTS

No investment was done to 31 December 2016 nor to 31 December 2015. In 2016 there was signed the contract for the supply of new tank semi-trailers in total value EUR 1 276 thousand. Tank semi-trailers will be delivered in 2017.

#### 19. RELATED PARTY TRANSACTIONS

#### 19.1 Material transactions concluded by the Company with related parties

In 2016 and 2015 there were no transactions concluded by the Company with related parties on other than market terms.

#### 19.2 Transactions with key management personnel

In 2016 and 2015 the Company did not grant to key management personnel and their relatives any advances, loans, guarantees and commitments or other agreements obliging them to render services to the Company and related parties. In 2016 and 2015, there were no significant transactions concluded with members of statutory bodies or with their family members or other related parties.

#### 19.3 Transaction with related parties concluded by key management personnel of the Company

In 2016 and 2015 the members of the key executive personnel, based on the submitted statements, did not conclude any transactions with their related parties.

### 19.4 Transactions and balances of settlements of the Company with related parties

Ultimate controlling party

Ultimate controlling party is POLSKI KONCERN NAFTOWY ORLEN S.A., which during 2016 and 2015 has owned a majority (62.99%) of shares in parent companies UNIPETROL RPA, s.r.o. and UNIPETROL, a.s.

## 20. REMUNERATION PAID AND DUE OR POTENTIALLY DUE TO THE KEY EXECUTIVE PERSONNEL AND STATUTORY REPRESENTATIVES

The remuneration of the key executive personnel and statutory representatives includes short-term employee benefits paid, due and potentially due during the year.

#### 20.1 Key management personnel and statutory bodies' members' compensation

	ANEW	2016	2015
	(2° = E)	Short-term benefits	Snort-term benefits
Remuneration of current period (costs)	/	6 402	5 808
Paid for previous year		781	781
Potentially due to be paid in the following year		1 025	781

Further detailed information regarding remuneration of k man ment personnel is included in note 4.3.

#### 20.2 Bonus system for key executive personnel of the Company

In 2016 the key executive personnel was participating in the annual MBO bonus system (management by objectives). The persons subject to the above mentioned system are remunerated for the accomplishment of specific goals set at the beginning of the bonus period. The bonus systems are structured in such way, so as to promote to achieve the best possible results for the Company. The goals so-said are qualitative or quantitative (measurable) and are evaluated following the end of the year for which they were set, based on the rules adopted in the applicable Bonus System Regulations.

#### 21. ACCOUNTING PRINCIPLES

### Impact of IFRS amendments and interpretations on separate financial statements of the Company

#### 21.1.1 Binding amendments and interpretations to IFRSs

The amendments to standards and IFRS interpretations, in force from 1 January 2016 until the date of publication of these separate financial statements had no impact on the foregoing separate financial statements.

#### 21.1.2 IFRSs, amendments and interpretations to IFRSs endorsed by the European Union, not yet effective

Standards and Interpretations adopted by the EU	Possible impact on financial statements
IFRS 9 - Financial Instruments	impact*
IFRS 15 - Revenue from Contracts with Customers	impact**

#### 21.1.3 Standards, amendments and interpretations adopted by International Accounting Standards Board (IASB), waiting for approval of the European Union

Standards and Interpretations waiting for approval of the EU	Possible Impact on financial statement
IFRS 14 - Regulatory Deferral Accounts	no impact expected
Amendments to IFRS 10 - Consolidated Financial Statements and IAS 28 - Investments in Associates: Sale	
or Contribution of Assets between an Investor and its Associate or Joint Venture	no impact expected
IFRS 16 - Leasing	impact***
Amendments to IAS 12 Income Taxes - Recognition of Deferred Tax Assets for Unrealized Losses	no impact expected
Amendments to IAS 7 Statement of Cash Flows - Diclosure initiative	no impact expected
Amendments to IFRS 15 - Revenue from Contracts with Customers	no impact expected
Amendments to IFRS 2 - Share-based Payment	no impact expected
Amendments to IFRS 4 - Insurance contracts	no impact expected
Improvements to IFRS (2014-2016)	no impact expected
IFRIC 22 - Foreign Currency Transactions and Advance Consideration	no impact expected
Amendments to IAS 40 - Investment Property	no impact expected

<sup>\*</sup>At the time of the implementation of the new IFRS 9, allocation of the appropriate financial assets to the new categories of financial instruments will be made.

#### 21.2 Functional currency and presentation currency

These separate financial statements are presented in Czech crowns (CZK), which is the Company's functional and presentation currency. All financial information presented in CZK has been rounded to the nearest thousand.

#### 21.3 Applied accounting policies

#### 21.3.1 Change in accounting policies, estimates and prior period errors

An entity shall change an accounting policy only if the change:

is required by an IFRS, or

results in the financial statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the financial position, financial performance or cash flows.

In case of change in accounting policy it is assumed that the new policy had always been applied. The amount of the resulting adjustment is made to the equity. For comparability, the entity shall adjust the financial statements (comparative information) for the earliest prior period presented as if the new accounting policy had always been applied, unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change.

Items of financial statements based on an estimate may need revision if changes occur in the circumstances on which the

estimate was based or as a result of new information or more experience.

The correction of a material prior period error is made to the equity. When preparing the first of the period when they occurred. ements it is assumed

<sup>\*\*</sup>At the time of the implementation, i.e. on 1 January 2017, the impact of the new IFRS 15 will depend on the specific facts and conditions of the contracts with customers, in which the Company will be a party.

<sup>\*\*\*</sup>At the time of implementation, the impact of the new IFRS 16 will depend on the specific facts and circumstances relating to the lease contracts, which the Company will be a party.

#### 21.3.2 Transactions in foreign currency

A foreign currency transaction is recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of the reporting period:

- foreign currency monetary items including units of currency held by the Company as well as receivables and liabilities
  due in defined or definable units of currency are translated using the closing rate, i.e. spot exchange rate as at the end
  of the reporting period,
  - non-monetary items that are measured at historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition as finance income or expense in the period in which they arise, except for monetary items which hedge the currency risk are accounted in accordance with cash flow hedge accounting principles.

#### 21.3.3 Revenues

Revenues from sales (from operating activity) comprise revenues that relate to core activity, i.e. activity for which the Company was founded, revenues are recurring and are not of incidental character.

Revenues from sales are recognised when the amount of revenue can be measured reliably, it is probable that the economic benefits associated with the sale transaction will flow to the Company and the costs incurred or to be incurred in respect of the transaction can be measured reliably. Revenues from sale of goods and services are recognized when the Company has transferred to the buyer the significant risks and rewards of ownership and the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold. Revenues include received or due payments for delivered goods and services decreased by the amount of any trade discounts, value added tax (VAT), excise tax and fuel charges.

Revenues are measured at fair value of the received or due payments. Revenues from sale are adjusted for profit or loss from settlement of cash flows hedging instrumenst related to above mentioned revenues.

Revenues and expenses relating to services for which the start and end dates fall within different reporting periods are recognized based on the percentage of completion method, if the outcome of a transaction can be measured reliably, i.e. when total contract revenue can be measured reliably, it is probable that the economic benefits associated with the contract will flow to the Company and the stage of completion can be measured reliably. If those conditions are not met, revenues are recognized up to the cost incurred, but not greater than the cost which are expected to be recovered by the Company.

#### 21.3.4 Costs

Costs (relating to operating activity) comprise costs that relate to core activity, i.e. activity for which the Company was founded, costs are recurring and are not of incidental character.

Cost of sales comprises costs of finished goods, merchandise and raw materials sold and adjustments related to inventories written down to net realizable value.

Distribution expenses include selling brokerage expenses, trading expenses, advertising and promotion expenses as well as distribution expenses.

Administrative expenses include expenses relating to management and administration of the Company as a whole.

#### 21.3.5 Other operating income and expenses

Other operating income in particular includes income from liquidation and sale of non-financial non-current assets, surplus of assets, return of court fees, penalties eamed, surplus of grants received to revenues over the value of costs, assets received free of charge, reversal of receivable impairment allowances and some provisions, compensations earned and revaluation gains, gain on sale of investment property.

Other operating expenses include in particular loss on liquidation and sale of non-financial non-current assets, shortages of assets, court fees, contractual penalties and fines, penalties for non-compliance with environmental protection regulations, cash and tangible assets transferred free of charge, impairment allowances (except those that are recognized as financial costs and cost of sales), compensations paid, write-off of construction in progress which have not produced the desired economic effect, cost of recovery of receivables and revaluation losses, loss on sale of investment property.

#### 21,3.6 Finance income and costs

Finance income includes, in particular, income from the sale of shares and other securities, dividends received, interest earned on cash in bank accounts, term deposits and loans granted, increase in the value of financial assets and net foreign exchange gains.

Dividend income from investments is recognized when the shareholders' rights to receive payment have been established. Finance costs include, in particular, loss on sale of shares and securities and costs associated with stell reale, impairment losses relating to financial assets such as shares, securities and interest, net foreign exchange losses, interest on own bonds and other securities issued, interest on finance lease, commissions on bank loans, sorre in securities.

#### 21.3.7 Tax expense

Income tax expenses comprise of current tax and deferred tax.

Current tax is determined in accordance with the relevant tax law based on the taxable profit for a given period and is recognized as liability, in the amount which has not been paid or receivable, if the amount of the current and prior periods income tax paid exceeds the amount due.

Deferred tax assets and liabilities are accounted for as non-current and are not discounted as well as are offset in the statement of financial position, if there is legally enforceable right to set off the recognized amounts.

The transactions settled directly in equity are recognized in equity.

#### 21.3.8 Property, plant and equipment

Property, plant and equipment are assets that are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes, and are expected to be used during more than one period (one year or the operating cycle, if longer than one year).

Property, plant and equipment include both fixed assets (assets that are in the condition necessary for them to be capable of operating in the manner intended by management) as well as construction in progress (assets that are in the course of construction or development necessary for them to be capable of operating in the manner intended by management).

Property, plant and equipment are initially stated at cost, including grants related to assets (IAS20). The cost of an item of property, plant and equipment comprises its purchase price, including any costs directly attributable to bringing the asset into use.

The cost of an item of property, plant and equipment includes also estimated costs of dismantling and removing the item and restoring the site/land on which it is located, the obligation for which is connected with acquisition or construction of an item of property, plant and equipment and capitalized borrowing costs.

Property, plant and equipment are stated in the statement of financial position prepared at the end of the reporting period at the carrying amount, including grants related to assets. The carrying amount is the amount at which an asset is initially recognised (cost) after deducting any accumulated depreciation and accumulated impairment losses.

Depreciation of an item of property, plant and equipment begins when it is available for use that is from the month it is in the location and condition necessary for it to be capable of operating in the manner intended by the management, over the period reflecting their estimated useful life, considering the residual value.

Components of property, plant and equipment which are material for the whole item are depreciated separately in accordance with their useful life.

The following standard useful lives are used for property, plant and equipment:

Buildings and constructions 10-40 years
Machinery and equipment 4-35 years
Vehicles and other 2-20 years

The residual value, estimated useful life and depreciation methods are reassessed annually, the adjustments to depreciation expenses are accounted for in next period (prospectively). The costs of significant repairs and regular maintenance programs are recognized as property, plant and equipment and

The costs of significant repairs and regular maintenance programs are recognized as property, plant and equipment and depreciated in accordance with their useful lives. The costs of current maintenance of property, plant and equipment are recognized as an expense when is incurred.

Property, plant and equipment are tested for impairment, when there are indicators or events that may imply that the carrying amount of those assets may not be recoverable.

#### 21.3.9 Investment property

Investment properties are properties which are held either to earn rental income or for capital appreciation or for both. Investment property shall be recognized as an asset when, and only when:

- it is probable that the future economic benefits that are associated with the investment property will flow to the Company, and
- the cost of the investment property can be measured reliably.

An investment property shall be measured initially at its cost. Transaction costs shall be included in the initial measurement. The cost of a purchased investment property comprises its purchase price and any directly attributable expenditure. Directly attributable expenditure includes, for example, professional fees for legal services, property transfer taxes and other transaction costs. For internally constructed investment property the cost is set at the date of construction completion when the asset is brought into use, in accordance with rules set for property, plant and equipment.

After initial recognition investment property shall be measured at fair value. Gains and losses resulting from changes in fair value of investment property are presented in the statement of profit or loss and other comprehensive income in the period which they arise. The Company determines fair value without any deduction for transaction costs it may incur on sale or other disposal.

If the Company determines that the fair value of an investment property is not reliably determinable on a continuing basis, the Company shall measure that investment property at cost in accordance with rules set for property, plant and equipment.

An investment property is derecognized on disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected.

#### 21.3.10 Intangible assets

Intangible assets include identifiable non-monetary assets without physical substance. An asset is identifiable if it is either separable, i.e. is capable of being separated or divided from the Company and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, regardless of whether the Company intends to do so, or arises from contractual or other legal rights, regardless of whether those rights are transferable or separable from the Company or from other rights and obligations.

Intangible assets are recognized if it is probable that the expected future economic benefits that are attributable to the

assets will flow to the Company and the cost of the asset can be measured reliably.

An intangible asset arising from development (or from development phase of an internal project) shall be recognised if, and only if, the Company can demonstrate all of the following: the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete the intangible asset and use or sell it, its ability to use or sell the intangible asset, how the intangible asset will generate probable future economic benefits, among other things, the

Company can demonstrate the existence of a market for the output of the intangible asset itself or, if it is to be used internally, the usefulness of the intangible asset, the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset, its ability to measure reliably the expenditure attributable to the intangible asset during its development.

If the definition criteria of an intangible asset are not met, the cost incurred to acquire or self develop an asset are recognised in profit or loss when incurred. An intangible asset that is acquired in a business combination, the cost of that intangible asset is its fair value at the acquisition date.

An intangible asset shall be measured initially at cost, including grants related to assets (IAS 20). An intangible asset that is acquired in a business combination, is recognised initially at fair value.

After initial recognition, an intangible asset shall be presented in the financial statements in its net carrying amount, including grants related to assets.

Intangible assets are measured at acquisition or at construction cost less amortization and impairment allowances. Intangible assets with a finite useful life are amortized when it is available for use that is when it is in the location and condition necessary for it to be capable of operating in the manner intended by the management over their estimated useful life. The depreciable amount of an asset with a finite useful life is determined after deducting its residual value. Excluding particular cases, the residual value of an intangible asset with a finite useful life shall be assumed to be zero. Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset, e.g. interest, commissions, are part of the initial cost.

The following standard useful lives are used for intangible assets:

Acquired licenses, patents, and similar intangible assets

Acquired computer software

2-15 years 2-10 years

Appropriateness of the applied amortization periods and rates is periodically reviewed, at least at the end of the reporting year, and potential adjustments to amortization allowances are made in the subsequent periods. Intangible assets with an indefinite useful life are not amortized. Their value is decreased by the eventual impairment allowances. Additionally, the useful life of an intangible asset that is not being amortized shall be reviewed each period to determine whether events and circumstances continue to support an indefinite useful life assessment for that asset.

#### 21.3.11 Impairment of property, plant and equipment and intangible assets

At the end of the reporting period the Company assesses whether there are any indicators that an asset or cash generating unit (CGU) may be impaired. If any such indicator exists, the entity shall estimate the recoverable amount of the asset (CGU).

The recoverable amount of other assets is the higher of the fair value less costs to sell and value in use.

Fair value less costs to sell is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, less costs to sell,

Value in use is the present value of the future cash flows expected to be derived from an asset or cash-generating unit. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Assets that do not generate the independent cash flows are grouped on the lowest level on which cash flows, independent from cash flows from other assets, are generated (cash generating units).

To the cash generating unit following assets are allocated:

- goodwill, if it may be assumed, that the cash generating unit benefited from the synergies associated to a business combination with another entity,
- corporate assets, if they may be allocated on a reasonable and coherent basis.

If there are external or internal indicators that the carrying amount of an asset as at the end of the reporting period may not be recoverable, the impairment tests are carried out. The tests are carried out also annually for intangible assets with the indefinite useful life and for goodwill.

When carrying amount of an asset or a cash generating unit exceeds its recoverable amount, the carrying amount is decreased to the recoverable amount by an adequate impairment allowance charged against cost in profit or loss. The recoverable amount is the higher of its fair value less costs to sell and its value in use.

The impairment loss shall be allocated to the carrying amount of the assets of the unit in the following order:

first, to reduce the carrying amount of any goodwill allocated to the cash-generating unit; and

then, to the other assets of the unit pro rata on the basis of the carrying amount of each asset At the end of each reporting period an assessment shall be made whether an impairment loss cognized in pries voeriods for an asset shall be partly or completely reversed. Indications of a potential decrease in an i mirror the indications of a potential impairment loss in prior periods.

A reversal of an impairment loss for an asset other than goodwill shall be recognised immediatel unless the asset is carried at revalued amount in accordance with another standard.

#### 21.3.12 Inventories

Inventories are assets held for sale in the ordinary course of business, or in the process of production for such sale, or in the form of materials or supplies to be consumed in the production process or in the rendering of services.

Inventories comprise products, semi-finished products and work in progress, merchandise and materials.

Finished goods, semi-finished products and work in progress are measured initially at production cost. Production costs include costs of materials and costs of conversion for the production period. Costs of production include also a systematic allocation of fixed and variable production overheads estimated for normal production level.

Finished goods, semi-finished products and work in progress shall be measured at the end of the reporting period at the lower of cost and net realisable value, after deducting any impairment losses.

Outgoings of finished goods, semi-finished products and work in progress is determined based on the weighted average cost formula, the cost of each item is determined from the weighted average of the cost of similar items produced during the reporting period.

Merchandise and materials are measured initially at acquisition cost.

As at the end of the reporting period merchandise and raw materials are measured at the lower of cost and net realizable value, considering any impairment allowances. Outgoings of merchandise and raw materials is determined based on the weighted average acquisition cost or production cost formula. Impairment tests for specific items of inventories are carried out on a current basis during an annual reporting period. Write-down to net realizable value concerns raw materials and merchandise that are damaged or obsolete.

Raw materials held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost. However, when a decline in the price of materials indicates that the cost of the finished products exceeds net realisable value, the materials are written down to net realisable value.

Expenses and revenues connected with inventories write-offs or establishment and release of allowances are included in cost of sales.

#### 21.3.13 Trade and other receivables

Trade and other receivables are recognized initially at the fair value increased by transaction costs and subsequently at amortized cost using the effective interest method less impairment allowances.

Impairment allowances of receivables are based on the individual analysis on the value of held collaterals, and based on the possible compensations of debts, allowances.

Recognition and reversal of impairment losses on receivables are recognized in other operating activity in relation to principal amount and in financial activities in relation to interest for delay payments.

#### 21.3.14 Cash and cash equivalents

Cash comprises cash on hand and in a bank accounts. Cash equivalents are short-term highly liquid investments (of original maturity up to three months) that are readily convertible to known amounts of cash and are subject to an insignificant risk of change in value. Cash equivalents are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

#### 21.3.15 Non-current assets held for sale and discontinued operation

Non-current assets (or disposal groups comprising assets and liabilities) that are expected to be recovered primarily through sale rather than continuing use are classified as held for sale.

Non-current assets are classified as held for sale when the following criteria are simultaneously met:

- the sales were declared by the appropriate level of management;
- the assets are available for an immediate sale in their present condition;
- an active program to locate a buyer has been initiated;
- the sale transaction is highly probable and can be settled within 12 months following the sale decision;
- the selling price is reasonable in relation to its current fair value;
- it is unlikely that significant changes to the sales plan of these assets will be introduced.

The classification of asset into this category is made in the reporting period when the classification criteria are met. If the criteria for classification of a non-current asset as held for sale are met after the reporting period, an entity shall not classify a non-current asset as held for sale in those financial statements when issued.

Immediately before classification as held for sale, the assets (or components of a disposal group) are remeasured in accordance with the Company's accounting policies. Thereafter generally the assets (excluding financial assets) are measured at the lower of their carrying amount and fair value less cost to sell. Any impairment loss on a disposal group first is allocated to goodwill, and then to remaining assets and liabilities on pro rata basis, except that no loss is allocated to inventories, financial assets, deferred tax assets, investment property, which continue to be measured in accordance with the Company's accounting policies. While a non-current asset is classified as held for sale it shall not be depreciated (or amortised). A gain is recognised for any subsequent increase in fair value less costs to sell of an asset, but not in excess of the cumulative impairment loss that has been previously recognised.

A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- represents a separate major line of business or geographical area of operations,

 is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations, or

- is a subsidiary acquired exclusively with a view to resale.

The Company shall re-present the disclosures presented with refer to discontinued operation for prior periods presented in the separate financial statements so that the disclosures relate to all operations that have been discontinued by the end of the reporting period for the latest period presented.

If the Company ceases to classify a discontinued operation, the results of operations previously presented in discontinued operations shall be reclassified and included in the results from continuing operations for all periods presented. The amounts for prior periods shall be described as having been re-presented.

#### 21.3.16 Equity

Equity is recorded in accounting books by type, in accordance with legal regulations and the Company's articles of association. Equity comprises:

#### 21.3.16.1 Share capital

The share capital is paid by shareholders and is stated at nominal value in accordance with the Company's articles of association and the entry in the Commercial Register.

#### 21.3.16.2 Hedging reserve

Hedging reserve relates to valuation and settlement of hedging instruments that meet the criteria of cash flow hedge accounting. The Company applies cash flow hedge accounting to hedge commodity risk, exchange rate risk and interest rate risk. Changes in fair value, which are an ineffective part of the hedge relationship, are recognized in the statement of profit or loss.

#### 21.3.16.3 Revaluation reserve

Revaluation reserve comprises revaluation of items, which, according to the Company's regulations, relates to the revaluation reserve, including particularly:

- change of the fair value of the available-for-sale financial assets:

differences between the net book value and the fair value of the investment property at the date of reclassification from the property occupied by the Company to the investment property.

#### 21.3.16.4 Retained earnings

Retained earnings include:

- the amounts arising from profit distribution/loss cover.
- the undistributed result for prior periods,
- the current reporting period profit/loss,
- the effects (profit/loss) of prior period errors,
- changes in accounting principles,
- other reserve capital as additional payments to equity.
- the actuarial gains and losses from retirement benefits.

#### 21.3.17 Trade and other liabilities

Liabilities, including trade liabilities, are initially stated at fair value, increased by transaction cost and subsequently, at amortized cost using the effective interest rate method.

Accruals are liabilities due for goods or services received/provided, but not paid, invoiced or formally agreed with the seller, together with amounts due to employees.

Although it is sometimes necessary to estimate the amount or timing of accruals, the uncertainty is generally much lower than it is for provisions.

#### 21.3.18 Provisions

A provision is a liability of uncertain timing or amount. Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and the amount of the obligation can be measured reliably. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

The amount recognized as a provision is the best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate.

Provisions are not recognised for the future operating losses.

#### 21.3.18.1 Environmental provision

The Company creates provisions for future liabilities due to reclamation of contaminated land or water or elimination of harmful substances if there is such a legal or constructive obligation. Environmental provision the provision of the basis of contaminated assessment.

#### 21.3.18.2 Jubilee bonuses and retirement benefits

Under the Company's remuneration plans, its employees are entitled to jubilee bonuses and retirement benefits. The jubilee bonuses are paid to employees after elapse of a defined number of years in service. The retirement benefits are paid once at retirement. The amount of retirement benefits and jubilee bonuses depends on the number of years of service and an employee's average remuneration.

The jubilee bonuses are other long-term employee benefits, whereas retirement and pension benefits are classified as retirement defined benefit plans.

The provision for jubilee bonuses, retirement and pension benefits is created in order to allocate costs to relevant periods. The present value of those liabilities is estimated at the end of each reporting period by an independent actuary and adjusted if there are any material indications impacting the value of the liabilities. The accumulated liabilities equal discounted future payments, considering the demographic and financial assumption including employee rotation, planned increase of remuneration and relate to the period ended at the last day of the reporting year. Actuarial gains and losses from:

- post employment benefits are recognized in components of other comprehensive income.
- other employment benefits, including jubilee bonuses, are recognized in the statement of profit and loss.

#### 21.3.18.3 Shield programs

Shield programs provision (restructuring provision) is created when the Company started to implement the restructuring plan or announced the main features of the restructuring plan to those affected by it in a sufficiently specific manner to raise a valid expectation in them that the restructuring will be carried out. A restructuring provision shall include only the direct expenditures arising from the restructuring, i.e. connected with the termination of employment (paid leave payments and compensations), termination of lease contracts, dismantling of assets.

#### 21.3.18.4 Other provisions

Other provisions include mainly provisions for legal proceedings and are recognized after consideration of all available information, including opinions of independent experts. If on the basis of such information it is more likely than not that a present obligation exists at the end of the reporting period, the Company recognises a provision (if the recognition criteria are met).

If it is more likely that no present obligation exists at the end of the reporting period, the Company discloses a contingent liability, unless the possibility of an outflow of resources embodying economic benefits is remote.

#### 21.3.19 Government grants

Government grants are transfers of resources to the Company by government, government agencies and similar bodies whether local, national or international in return for past or future compliance with certain conditions relating to the activities of the entity.

Government grants are recognized in the statement of financial position as deferred income when there is reasonable assurance that it will be received and that the Company will comply with the conditions attached to it.

Grants related to costs are presented as compensation to the given cost at the period they are incurred. The surplus of the received grant over the value of the given cost is presented as other operating income.

If the government grants relates to assets, it is presented net with the related asset and is recognized in statement of profit or loss on a systematic basis over the useful life of the asset through the decreased depreciation charges.

#### 21.3.20 Separate statement of cash flows

The separate statement of cash flows is prepared using indirect method.

Cash and cash equivalents presented in the separate statement of cash flows include cash and cash equivalents less bank overdrafts, if they form an integral part of the Company's cash management.

Dividends received are presented in cash flows from investing activities.

Dividends paid are presented in cash flows from financing activities.

Interest received from finance leases, loans granted, short-term securities and cash pooling system are presented in cash flows from investing activities. Other interests received are presented in cash flows from operating activities.

Interest paid and provisions on bank loans and borrowings received, cash pool facility, debt securities issued and finance leases are presented in cash flows from financing activities. Other interests paid are presented in cash flows from operating activities.

#### 21.3.21 Financial instruments

#### 21.3.21.1 Measurement of financial assets and liabilities

At initial recognition, the Company measures financial assets and liabilities at its fair value plus, in the case of a financial asset or a financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

At the end of the reporting period the Company measures loans and receivables including trade receivables at amortized cost using effective interest rate method. Effective interest is the rate which discounts estimated that the cosh flows or payments made in expected periods until financial instrument expiration, and in justified situations in shorter period, up to net book value of financial asset or liability.

At the end of the reporting period the Company measures its financial liabilities at amortized state the effective interest rate method.

27

#### 21.3.21.2 Transfers

In the Company there were no particular circumstances for the reclassification of the financial instruments measured at fair value through profit or loss.

#### 21.3.22 Fair value measurement

The Company maximises the use of relevant observable inputs and minimizes the use of unobservable inputs to meet the objective of fair value measurement, which is to estimate the price at which an orderly transaction to transfer the liability or equity instrument would take place between market participants as at the measurement date under current market conditions.

The Company measures derivative instruments at fair value using valuation models for financial instruments based on generally available exchange rates, interest rates, forward and volatility curves, for currencies and commodities quoted on active markets.

Fair value of derivatives is based on discounted future flows related to contracted transactions as a difference between term price and transaction price.

Forward rates of exchange are not modeled as a separate risk factor, but they are calculated as a result of spot rate and forward interest rate for foreign currency in relation to CZK.

Derivative instruments are presented as assets, when their valuation is positive and as liabilities, when their valuation is negative.

Gains and losses resulting from changes in fair value of derivative instruments, for which hedge accounting is not applicable, are recognised in a current year profit of loss.

As compared to the previous reporting period the Company has not changed valuation methods concerning derivative instruments.

#### 21.3.23 Lease

A lease is an agreement whereby a lessor conveys to the lessee in return for a payment or series of payments the right to use an asset for an agreed period of time.

Assets used under the operating lease, that is under the agreement that does not transfer substantially all the risks and rewards incidental to ownership of an asset to the lessee, are recognised as assets of the lessor. Determining whether the transfer or risks and rewards exists depends on the assessment of essence of the economic substance of the transaction.

#### 21.3.24 Contingent assets and liabilities

Contingent liabilities are defined as possible obligations that arise from past events and which are dependent on occurrence or non-occurrence of some uncertain future events not wholly within the control of the Company or present obligations that arise from past events but is not recognised because it is not probable that an outflow of resource embodying economic benefits will be required to settle the obligations or the amount of the obligation cannot be measured with sufficient reliability. Contingent liabilities are not recognized in the statement of financial position however the information on contingent liabilities is disclosed unless the probability of outflow of resources relating to economic benefits is remote. Contingent liabilities acquired as the result of a business combination are recognized as provisions in the statement of financial position.

Contingent assets are possible assets that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

Contingent assets are not recognized in the statement of financial position as it may lead to recognition of the income, which will never be gained; however the respective information on the contingent receivable is disclosed if the inflow of assets relating to economic benefits is probable the Company discloses respective information on the contingent asset in the additional information to financial statements and if practicable, estimates the influence on financial results, as according to accounting principles for valuation of provisions.

Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognised in the financial statements of the period in which the change occurs. If an inflow of economic benefits has become probable, an entity discloses the contingent asset.

#### 21.3.25 Subsequent events after the reporting date

Subsequent events after the reporting date are those events, favourable and unfavourable that occur between end of the reporting period and date of when the financial statements are authorized for issue. Two types of subsequent events can be identified:

- those, that provide evidence of conditions that existed as the end of the reporting period (events after the reporting period requiring adjustments) and
- those that are indicative of conditions that arose after the reporting period (events after the reporting period not requiring adjustments).

#### 22. APPLICATION OF PROFESSIONAL JUDGEMENT AND ASSUMPTIONS

The preparation of separate financial statements in conformity with IFRSs requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, a july, revenues and expenses. The estimates and associated assumptions are based on historical experier standardious other factors that are believed to be reasonable under the circumstances, the results of which form the standard of making the

judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

In the matters of considerable weight, the Company's management bases its estimates on opinions of independent experts.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Judgments made by management in the application of IFRSs that have significant effect on the financial statements and estimates with a significant risk of material adjustment in the next year are discussed in notes: 7. Tax expense, 8. Property, plant and equipment, 9. Intangible assets, 16. Financial instruments and 16.4.3 Changes in impairment allowances of trade and other receivables.

The accounting policies described above have been applied consistently to all periods presented in these separate financial statements.

# Audit performed and Audit Report prepared by

22HLAV s.r.o. Všebořická 82/2. Ústí nad Labem The Chamber of Auditors license no. 277 Member of MSI Global Alliance, Legal & Accounting Firms

responsible auditor: Ing. Miroslava Nebuželská, The Chamber of Auditors license no. 2092

## INDEPENDENT AUDITOR'S REPORT

for the shareholders of PETROTRANS, s.r.o.

## **Financial Statements Audit Report**

#### **Opinion**

We have audited the financial statements of PETROTRANS, s.r.o. (hereinafter also the "Company") prepared in accordance with International Financial Reporting Standards as endorsed by the European Union, which comprise the statement of financial position as at 31 December 2016, and the income statement and statement of other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information. For details of the Company, see Note 1 to the financial statements.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of PETROTRANS, s.r.o. as at 31 December 2016, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as endorsed by the European Union.

### **Basis for Opinion**

We conducted our audit in accordance with the Act on Auditors, Regulation (EU) No. 537/2014 of the European Parliament and the Council, and Auditing Standards of the Chamber of Auditors of the Czech Republic, which are International Standards on Auditing (ISAs), as amended by the related application clauses. Our responsibilities under this law and regulation are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Act on Auditors and the Code of Ethics adopted by the Chamber of Auditors of the Czech Republic and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Other Information**

In compliance with Section 2(b) of the Act on Auditors, the other information comprises the information included in the Annual Report other than the financial statements and auditor's report thereon. The Board of Directors is responsible for the other information.

Our opinion on the financial statements does not cover the other information. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. In addition, we assess whether the other information has been prepared, in all material respects, in accordance with applicable law or regulation, in particular, whether the other information complies with law or regulation in terms of formal requirements and procedure for preparing the other information in the context of materiality, i.e. whether any non-compliance with these requirements could influence judgments made on the basis of the other information.

Based on the procedures performed, to the extent we are able to assess it, we report that:

- The other information describing the facts that are also presented in the financial statements is, in all material respects, consistent with the financial statements; and
- The other information is prepared in compliance with applicable law or regulation.

In addition, our responsibility is to report, based on the knowledge and understanding of the Company obtained in the audit, on whether the other information contains any material misstatement of fact. Based on the procedures we have performed on the other information obtained, we have not identified any material misstatement of fact.

## Responsibilities of the Company's Board of Directors and for the Financial Statements

The Board of Directors is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the Czech Republic and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

## Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the above law or regulation, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.

Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the

date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
